

Taqhi Shopping Mall — Product Handling & Environmental Reference

DEMO PORTFOLIO DATA. These limits are synthetic examples for software testing. They are not manufacturer specifications and must not be used to release, transport, quarantine or consume real products. Real operations must use approved labels, supplier specifications, SDS documents and validated procedures.

Environmental parameters monitored: temperature, relative humidity, surface pressure, precipitation, wind speed and weather code. Pressure remains informational unless an approved product specification defines a numeric pressure range.

Category inspiration comes from public IKEA and LuLu Mall/LuLu Hypermarket category structures. This project uses synthetic records and does not reproduce proprietary retailer inventory.
